

Celebrating 10 Years

WOUND CARE AWARENESS

Celebrating a decade of spreading wound care awareness.

For the past decade, Healogics has successfully focused on patient, provider, and community engagement. The innovative advanced treatment options provided help to identify, heal, and prevent chronic wounds. Come Heal With Us!

Chronic wounds are projected to increase **2%** annually over the next **10 years**.

Common chronic wounds:

- 31%** Diabetic Foot Ulcer
- 43%** Pressure Injuries
- 12%** Venous Stasis Ulcer
- 8%** Surgical Wound/Trauma
- 6%** Arterial Ulcer

Patients with wounds, on average, have **3-4** or more **chronic conditions**.

Advanced wound care treatments include **debridement, total contact casting or offloading, new tissue growth, negative pressure wound therapy, and hyperbaric oxygen therapy.**

Nearly **7 million** Americans are living with a chronic wound.

Nearly **25%** of people with diabetes will experience a diabetic foot ulcer.

Many factors and conditions that contribute to the development of a chronic wound include **diabetes, obesity, heart disease, compromised immune systems, and prolonged periods of immobility.**

Pandemic-related delays in care have been associated with a **50%** increase in amputations.

Amputation risk is reduced by nearly half when care is provided by a **multidisciplinary wound care team.**

If you are living with a non-healing wound, or caring for someone who is, request an appointment today.
