

The dental program is a collaborative community effort between Sarah Bush Lincoln Health System, Lake Land College Dental Hygiene Program and area dentists in the East Central Illinois Dental Society who volunteer their time.

The mobile dental clinic was made possible through Lumpkin Family Foundation, Sarah Bush Lincoln Funding the Future Campaign, as well as grants from Illinois Children's Healthcare Foundation, the Walmart Foundation's State Giving Program, Delta Dental of Illinois Foundation, and Rural Health Care Services Outreach.

Restorative dental care for children on the Free or Reduced Meal program is made possible by funding from WomenConnected.

Sarah Bush Lincoln Dental Services

A collaborative community effort that provides dental care at no cost to families who qualify. The program serves a nine-county service area including Clark, Coles, Cumberland, Douglas, Edgar, Effingham, Jasper, Moultrie and Shelby. Organizations that have existing partnerships with SBL Dental Services include 66 local elementary and secondary schools, a Head Start program, local health departments, the Regional Office of Education #11, Lake Land College and other vital community partners.

In addition to our staff of one full-time and two part-time dentists, we have volunteer dentists in the community. Each year, the program reaches nearly 4,000 children.

What We Provide

Sarah Bush Lincoln Dental Services provides:

- Oral health education
- Comprehensive exams
- Preventive dental care
 - Cleanings
 - Fluoride treatments
 - Dental Sealants
- Surgical and restorative dental care
 - Extractions, fillings, crowns, pulp therapy, and space maintainers

Our Clinics

Our portable and mobile dental clinics aim to remove transportation barriers. During the school year, we visit schools, and children are dismissed from class to receive services.

Portable Dental Clinic:

Our portable dental equipment allows us to set-up a clinic inside schools and other community buildings. Preventive services and screening exams are provided in this setting.

Mobile Dental Clinic:

Our mobile clinic provides comprehensive services and features three operatories in a bright and cheery atmosphere. Each chair is equipped with a television for kids to enjoy their favorite videos. Additionally, nitrous oxide (laughing gas) is available to help children with mild dental anxiety.

Volunteer Dental Offices: Participating volunteer dentists provide services in their private practices.

Eligibility

Who is eligible for dental care through SBL Dental Services?

- Children 10 months to 18 years
- Children who receive benefits through Medicaid/AllKids
- Children eligible for Free/Reduced Lunch Program
- Mothers with dependent children who qualify for Medicaid or W.I.C. and don't have private dental insurance

Dental health is vitally important for children. A healthy smile gives children more self-esteem, and helps them learn better in school.

Help us give your children a bright smile.
