Course Overview

Cardiopulmonary Resuscitation is a hands-on learning experience designed to introduce the learner to the initial actions that should be taken in the event of a cardiac emergency.

Participants will learn how to assess a victim of a cardiac arrest, how to access help, and how to begin providing life-saving interventions for those victims of sudden cardiac events.

Healthcare providers are also instructed in the safe operation of an automated external defibrillator on children and adults. They are also instructed in the safe usage of a barrier device for providing mouth-to-mask ventilations and the use of a bag-valve mask device.

Course Dates & Times

To register for a class please call EMS for details at **(217) 258-2403**.
